

February 2021 Newsletter

We will be celebrating Valentines with a party COVID style on February 12th. The residents will be making a Valentines box for their goodies from the staff and community. This should be a fun afternoon! If anyone from the community would like to bring valentines up for the residents, they are more than welcome!

On January 28th Valley View received their first dose of the Pfizer vaccine. We had 8 residents, 8 tenants at the apartments, and 20 staff members get vaccinated! Our next clinic will be held on 2/18/2021.

For the residents that received the antibody infusion after being diagnosed with COVID were not eligible to receive the vaccine at this time. People who receive the antibody infusion must wait 90 days from infusion to qualify for the vaccine. We have been in contact with Walgreens and Butler County Public Health about how we can get those vaccinated. Right now, it does sound like we can get them from Butler County Public Health when that time comes.

Even though the vaccine is being distributed we are still unsure what this will mean for our residents and families in the near future. It is unlikely that our policies/requirements will change regarding visitation and opening our doors back up for some time yet.

Happy
VALENTINE'S
DAY
